

## A Second of Time

On the following page are descriptions of Disney movies involving time travel. To solve this quest, first you will need to figure out which movie each question describes.

Next, use the time code coordinates to identify what is happening at specific points in each movie. Keep track of the time codes as you go, and add or subtract them as directed.

The final amount of time you are left with is the time code to use for the final movie. Answer the last question there as your final quest answer.

*You can do this quest without Disney+, but you'll need access to all 8 of the movies.*

- 1 Join a brilliant young inventor named Lewis as he sets off on a time-traveling journey to find the family he never knew... living in a fantastical world of 2037. Find a scene with Wilbur at one of these time codes. 09:54, 11:46, 13:35 or 18:20.
- 2 Three mystical guides lead young Meg on an epic journey, "tessering" through time and space to find her father following his mysterious disappearance. Who is the "final piece of the puzzle?" If it is Mrs. Which, add 24:21. If it is Mrs. Who, subtract 24:21.
- 3 An ordinary boy finds he is destined for a most extraordinary adventure aboard a futuristic spacecraft. After a mystifying disappearance, David Freeman returns possessing vast, undiscovered knowledge about the universe. At 28:41, David will let you know if you should add that time to your total.
- 4 When an earthquake rumbles through the ballpark during a Little League game, a 14-year-old boy falls back in time to the mythical medieval kingdom of Camelot and the court of legendary King Arthur. If King Arthur is chewing on a hot dog a 40:40, add the time. If he is chewing on bubble gum, subtract the time.
- 5 Three high school outcasts shake up their school's social structure when they invent a machine that can take them back in time-just far enough to alter conversations, events and interactions that led to them being stigmatized as part of the "out" crowd. But when they accidentally open a black hole, they learn that turning back the clock can create a massive mess. Add the scene in which you see someone talking about time. 17:19, 30:50, 51:16, or 01:07:50.
- 6 Bruce Willis stars as Russ Duritz, a career-minded man who has spent all of his incredibly empty life forgetting the child he used to be- until the day he meets him face-to-face. Once Rusty proves that he really isn't a hallucination, Russ will need to accept his goofy but well-meaning past and embrace his younger self's kindness... if he wants to get Rusty back home. At 54:03, if Rusty's boxing gear is red, add the time. If it is blue, subtract the time.
- 7 Princess Cinderella is living a perfect life... until her stepmother steals the Fairy Godmother's magic wand and turns back time. With a wicked spell, she erases the Prince's memories and shatters Cinderella's happily-ever-after. If Drizella is smelling the flowers at 26:12, add that time. If Anastasia is smelling the flowers, subtract the time.
- 8 The epic conclusion to the Infinity Saga that became a critically acclaimed worldwide phenomenon, this dramatic showdown pits the Avengers against Thanos. After devastating events wiped out half the world's population and fractured their ranks, the remaining heroes struggle to move forward. But they must come together to restore order and harmony in the universe and bring their loved ones back. Go to your final calculated time code to find out your question.
